*Expert and Unbiased IT Infrastructure Consulting*

**Yahoo!**  
**NEW CORPORATE CAMPUS**  
**and IT RELOCATION**  
*Sunnyvale, CA*

## PROJECT DESCRIPTION

IT Infrastructure Consulting and Project Management

Data Center Design and Budgets

Data Center Build Project Management

## OVERVIEW

Yahoo!, a leading Internet communications and commerce services company, was experiencing such astronomical growth in 2000 that it made plans to relocate its headquarters to a campus in Sunnyvale, CA. This new seven building campus would house over 1,500 employees and have a very intricate IT blueprint. **TELADATA** was engaged to collaborate with the project design team and offer its expertise on telecommunications and IT infrastructure design.

## THE CHALLENGE

Yahoo had this project on a rigid 12 month schedule and downtime was not an option. Coordination of a large team of vendors, architects, and contractors would be crucial to the extremely demanding timeline of this project. **TELADATA's** project management experience would be key in making sure all telecommunications work would be finished on time.

## THE SOLUTION

**TELADATA** designed the voice and data cabling infrastructure and decided that due to the large size of the project, the cabling contracts for the interior, exterior, and data center would need to be divided into three separate sections. Each section was put out to bid separately where no one cabling contractor could be awarded more than one section of the job. When one of the contractors fell behind **TELADATA** was prepared and was able to assign one of the other cable contractors to the job to ensure a successful outcome. **TELADATA** worked closely with the construction manager, architect, and contractors to create and validate the IT planning process and budget. **TELADATA** was also responsible for designing the data center, PBX room, MDF, IDF rooms, remote switch, and fiber MPOE rooms. Yahoo was able to move in on time, on budget, and with a first rate IT Infrastructure. After **TELADATA's** accomplishments in Sunnyvale, **TELADATA** was contracted to handle Yahoo! projects that include the Santa Monica Campus and Burbank Campus, and buildings in Glendale and Hillsboro. **TELADATA** continues to work on various projects for Yahoo!
