If you said yes to the above, please, continue reading...

This is an exciting opportunity for an experienced Audio Visual Engineer/Consultant/ Project Manager with strong technical knowledge in AV who loves the challenge of working with a variety of Fortune 500 companies, marvels at the opportunity to be an expert in the AV field, and is a true team player.

Our Consultant/Project Managers act as Client Advocates and guide the process from gathering and analyzing client's needs to finding and implementing solutions to match expectations while battling time and resources. Through our methodology and expertise of our employees, we often bring better solutions at significant savings (see www.teladata.com for examples).

For over 20 years, **TELADATA** has been offering a flexible, family friendly work environment, encouraging personal and professional growth, and has built an upbeat, creative, and very supportive team. We offer a great combination of being a small company who significantly contributes on projects for much larger companies that have a variety of cutting edge technologies.

Job Description:

You will be a Client Advocate and technical expert for multiple Audio Visual infrastructure projects and will work closely with clients. As a Client Advocate you will ensure technology objectives are met. In a Project Manager role, you will set goals for your team, be a mentor, and ensure staff training, as well as manage account budgets and internal billing.
