Location: Fremont, California

www.teladata.com

Are you an experienced Project Manager who:

- Loves a challenge of working with different companies
- Enjoys learning about cutting edge technologies
- Will contribute to a collaborative working environment
- Wants to be a Client Advocate and drive complex projects to success
- Appreciates a company that encourages a flexible, family friendly environment
- Have experience with one or more of the following: **IT infrastructure, Data Center Operations, commercial Building construction Project Management**

If you said yes to the above, please, continue reading...

This is an exciting opportunity for an experienced Project Manager who loves the challenge of working with a variety of Fortune 500 companies, marvels at getting to learn about a wide range of cutting edge technologies, and appreciates a collaborative working environment.

Our Project Managers act as Client Advocates and guide the process from analyzing client's needs to finding and implementing solutions to match client expectations battling time and resources. Through our methodology and expertise of our employees, we often bring better solutions at significant savings (see www.teladata.com for examples).

For over 20 years, **TELADATA** has been offering a flexible, family friendly work environment, encouraged personal and professional growth, and has built an upbeat, creative and very supportive team. We offer a great combination of being a significant contributor in a small company while working on projects for much larger companies that have a variety of cutting edge technologies.

Job Description:

You will be a client advocate for multiple data center infrastructure projects and will work closely with clients to implement **TELADATA**'s project scope, deliverables, and client technology objectives. You will set goals for your team, mentor, and ensure staff training, as well as manage account budgets and internal billing.
